MAKE YOURSELF AT HOME – ESPECIALLY ON BOAT

If you like to experience foreign countries and different cities, traveling by boat or yacht is perfect for you. But even the best trip can be ruined by insomnia or backache. That's why we chose to produce high quality mattresses for boats, yacht and other travel vehicles. Our mattresses are manufactured from only the most comfortable and high-quality materials. Each mattress matches with your individual needs – for a wonderful night's sleep on board.

Our bespoke mattresses are hand-made in Germany in a direct cooperation with you. Because your needs and our expert knowledge determine what kind of mattress suits you perfectly. You can be sure your new mattress is made to a precise fit and finished to the highest quality – even for the most unusually shaped beds.

OUR PHILOSOPHY

Quality

Laroma mattresses are committed to quality and fitting accuracy. During the manufacturing process we choose only sustainable materials with a high quality standard. Our materials are natural finish and certified with the Ökotex Standard 100 certificate.

We also care about our social responsibility. That's why we only produce in Germany, exclusively by handwork and always with the best materials for us and for our environment.

Fair Prices

Our products satisfy our customers because of their excellent price/performance ratio. That's because we're calculating in a fair way plus we sell straight from the manufacturer. Unnecessary and cost intensive sales channels do not increase our prices.

Personality

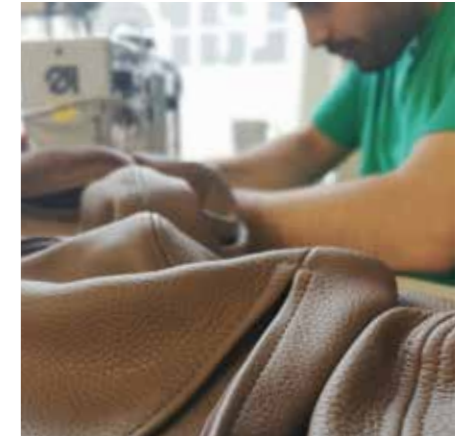

Performance means service for us. Our goal is your perfect sleep. This works out best when we communicate to each other without taking a detour. So call us! Get in contact with us and we will take care of you and your sleeping needs.

OUR MANUFACTURE

Laroma products are made by a combination of handwork and advanced technology. As we are producing only in Germany, we also care about the quality standards of our partners.

We always stay flexible, innovative, premium and in price worthwhile. Slatted frames, motor slatted frames or high-quality wooden beds are produced by a social welfare organization for disable people.

No matter what kind of material (foam, wood or woven materials) is required, our experts will create the perfect mattress for an individual just-for-you-solution.

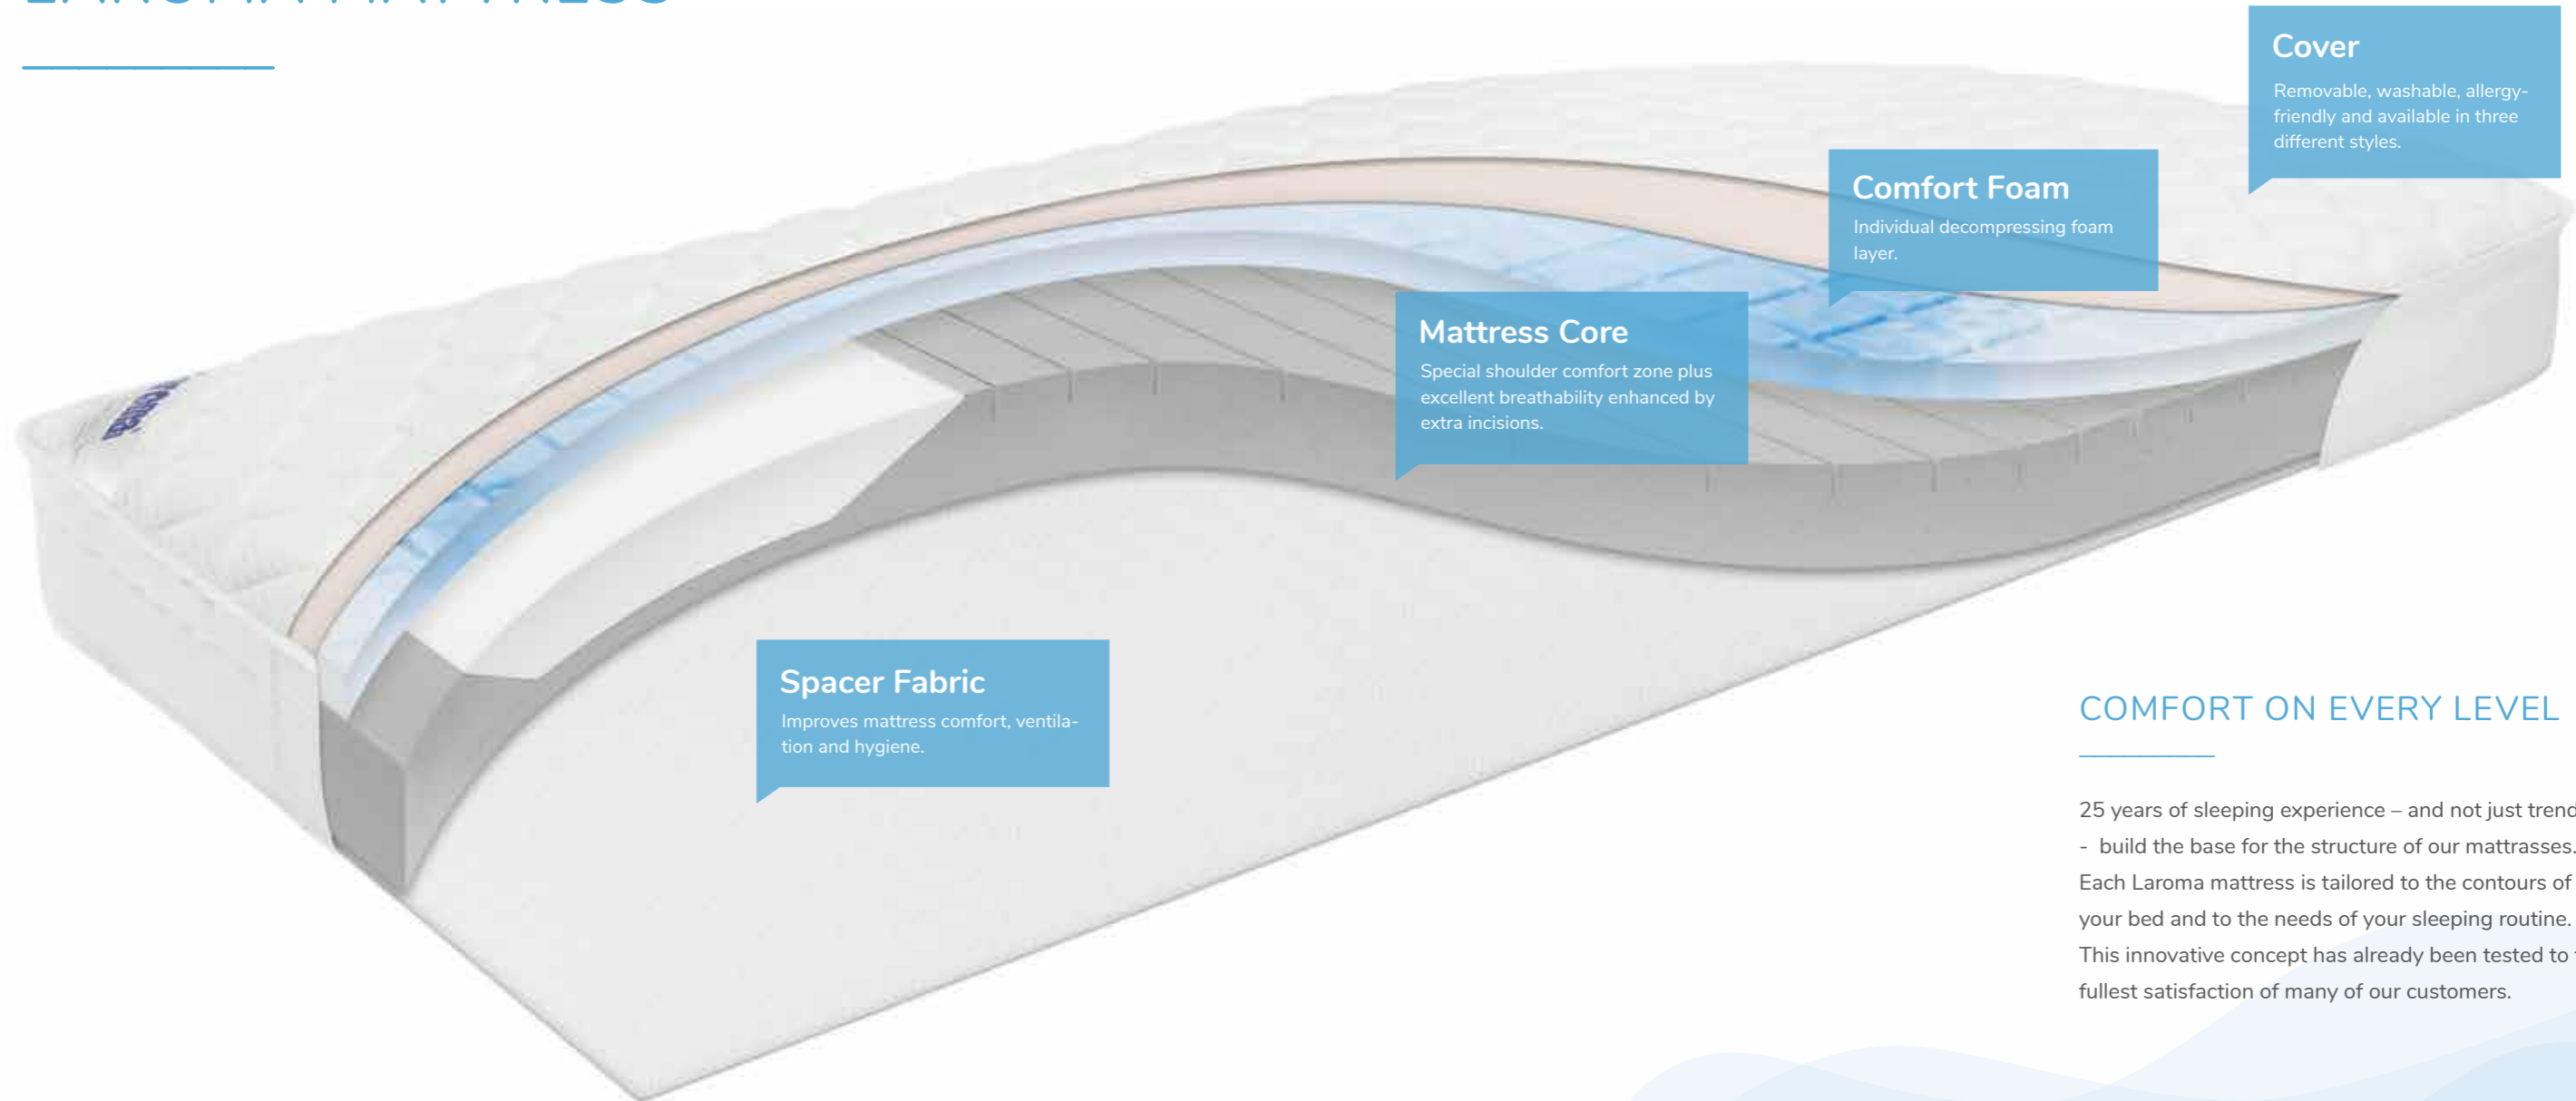

MADE TO MEASURE

Our mattresses are designed to give you your home comfort in a marine environment, ensuring you get the constitutional and relaxing sleep you wish for – even for the most unusually shaped beds.

With our simple and clever designed templating kit we can provide you the perfect mattress without the need to visit your boat. And if you need some assistance don't hesitate to contact us for a personal appointment.

LAROMA MATTRESS

Cover
Removable, washable, allergy-friendly and available in three different styles.

Comfort Foam
Individual decompressing foam layer.

Mattress Core
Special shoulder comfort zone plus excellent breathability enhanced by extra incisions.

Spacer Fabric
Improves mattress comfort, ventilation and hygiene.

MATERIALS

Our boat mattress materials are not just top-quality but also functional. Our main focus lies on your sleeping quality on board.

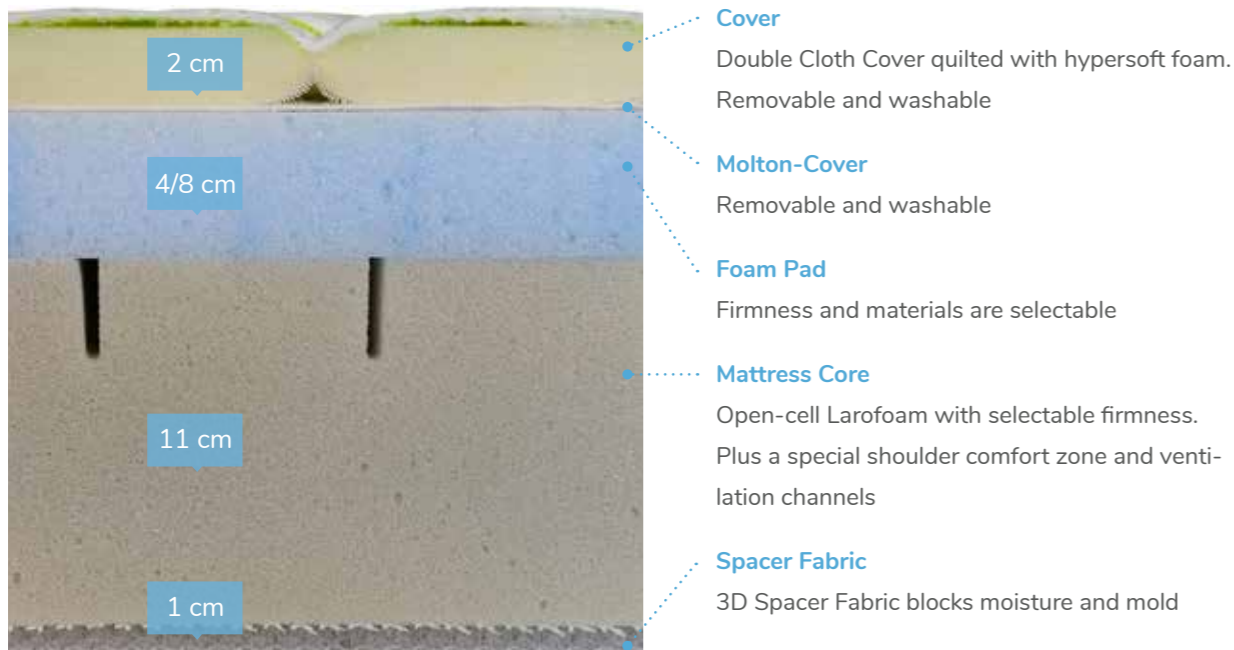

That means a range of fabrics: an individual selected mattress core, remove- and washable covers plus a 3D spacer fabric underneath and sideways the mattress for optimal ventilation and protecting the mattress from moisture seeping into the fabrics, causing mold and mildew. We can help you customize a boat mattress that will offer years of comfort and deep sleep.

HEIGHT MATTERS

The Laroma mattress is available in three different heights. Which is the best for you essentially depends on your pressure-sensitivity and your physical condition. By increasing the mattress height, we basically are able to build your mattress softer and even more comfortable.

GOOD TO KNOW

WASHABLE COVER

Each Laroma mattress is provided with a detachable, high-quality mattress cover for an easy washing up to 60°C. The molton-cover underneath offers you the possibility of a gapless use of your mattress at night during the cleaning process.

USEFUL SPACER FABRIC

The tridimensional structure of the 3D Spacer fabric improves mattress comfort and hygiene. It regulates heat and moisture as the structure of fabric, helps to transport liquid away and allows air to flow through – for a healthy and fresh sleeping climate.

10 mm spacer fabric underneath and 3 mm spacer fabric sideways blocks moisture and mold.

FUNCTION OF THE SPINE

The spine, or backbone, is your body's central support structure. It connects different parts of your musculoskeletal system. The spine helps you to sit, stand, walk, twist and bend. The spinal column is set up of a series of bones called vertebrae, stacked onto each other.

her. Vertebrae are cushioned by discs. Discs protect the bones by absorbing shocks from daily activities like walking, running, lifting and twisting.

Age-wise and during activities on a daily basis walking, sitting or standing causes pressure onto the discs

which dehydrate and slowly lose their fluid. And here we go to the point of sleep: while sleeping or while laying a bit longer makes the discs recover. The soft, gelatinous inner portion of the disc absorbs the lymph again. But: if you're not positioned in a way that keeps your spine aligned and relaxed this process can't get activated by our body. The discs lose their elasticity and height as a result of dehydration. The tough outer ring cracks, the gelatinous core escapes and is followed by a slipped disc in the worst case.

And that's exactly why sleeping comfort is essential. By keeping the body position neutral and relaxed like it should be, your spine will stay in a position similar to its optimal standing posture: chin up, shoulders low, back straight, knees relaxed, hips aligned with the shoulders.

Please do not hesitate to contact us for a qualified consultancy!

INDIVIDUAL MARINE UPHOLSTERY

There is no place as comfortable to relax as on the water. But therefore you must have suitable cushions in- and outside. We manufacture seats, benches and armatures of the very best quality, so that during the time on board you can always enjoy the highest comfort. By using different qualities of comfort foam and a wide range of different high quality fabrics, we come to the most beautiful end result. You choose, we manufacture.

MARINE UPHOLSTERY & CUSHIONS

Cushions on board or yacht are a broad concept. The cushions in a salon need a different seating comfort than the cushions in a dinette or a navigation corner. Outdoor cushions also match to a totally different

requirements. That's why we have a great variety of elegant and practical fabrics for a comfortable, stylish upgrade of your cushions.

QUALITY

Giving your boat cushions a makeover is something you don't like to do very often. That's why we only use high-quality fabrics. We provide breathable fabrics, fabrics which are resistant against the sun and mold and much more. The right material is available for every purpose.

CUSTOMIZATION

An individual customization is essential on board. Each cushion must have the perfect fit and provide comfort. We realize every shape and every thickness – handmade of course. Style, design and seating comfort are manufactured according to the customer's wishes and ideas. If you have an idea for something different or a particular fabric in mind our bespoke service is for you.

FINISHES

We offer an impressive range of materials to serve every taste and every idea from you. Our clients are able to combine all kinds of materials. Recover or new – we can serve you.

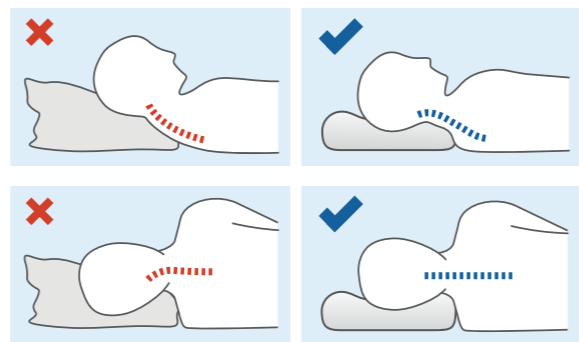

LAROMA PILLOW

The VARIO 3 pillow supports your neck and head in a natural position and gives you a good night's sleep. The contoured design follows the natural curve of your body; supporting your head and neck and preventing the flexing of your neck over the night which can result in morning-pain and stiffness. Even respiration, snoring and neck problems can be provided.

Discover a soft lying experience thanks to the visco-elastic foam – available in three different heights. The pillow cover is removable and washable up to 40°C, so that people suffering from allergies can enjoy the comfort of their VARIO 3 pillow.

The outstanding Micro Tencel cover gives excellent moisture regulation. For an extra portion of comfort in your bedroom on board.

LAROMA TOPPER

If you like an extra portion of comfort in your bed, then a topper will be a good solution. It is a double trimmed extra soft foam pad, which is zipped on our mattresses. The extra soft foam pad should have at least a height about 4-8 cm so that the topper can create a wonderful connection between body and mattress. Pressure will be reduced because of the topper which cushions the body pressure on the mattress.

The more firm your sleeping underlayment is the more you move while sleeping. Because of too much firmness the pressure on your body is too heavy so that you move from one side to another during the

night. The consequence is a disturbed sleeping and no regeneration during the night.

The Laroma toppers adjust the movements in your sleep and allow you to lie comfortably including relaxing pressure relief and reliable body support.

Beside the extra of lying comfort the Laroma topper also ensures also a dry sleeping climate thanks to its intelligent moisture regulation. The open cell structure of the foam pad is ventilating, the perspiration moisture is perfectly drained. And if something happened the topper is washable.

NOTES

Series of horizontal dashed lines for taking notes.
